Authorisation Letter

To Whomsoever it may concern

This is to certify that Power Technology Pyramids Company (PTP), Tehran, Iran is fully capable of handling Generator Protection systems based on REG216 platform, and they have already done several projects coordinated by ABB, e.g. Karun 3 HEPP commissioning, Ramin STPP design, commissioning, and Masjid-e Soleiman HEPP extension. They are our authorised subcontractor for such engineering works in Iran.

The same applies for Shahid Abbaspour HEPP Generator protection system rehabilitation project, where we hereby fully support their application, and ensure that performance of the system to be supplied by PTP here will be same as other projects done with REG216 in KWPA by ABB, e.g. Karkheh, Karun 3, and Masjid-e Soleiman. In case if required, ABB Switzerland will provide them technical support in this application as well.

They are very professional in their works, and we are confident that they will be able to perform to the satisfaction of the customers.

This letter can be treated as LETTER OF AUTHORIZATION for them to apply our REG216 Generator Protection Systems in Shahid Abbaspour Project.

Thanking you,

For ABB Switzerland Ltd,

Nikolaus Gaebler
Head of Sales, Asia & Asia Pacific
Protection and SA

Krishna Prasad
